Work Experiences

Focus Digital Syndicate

Barcelona Remote
Duration: 1 year 1 month

Back End Developer

Development of server-side applications for real estate services and internal CRM systems. Responsible for designing workflows and business logic for various application components. Experience working with scalable systems and ensuring optimal performance. Proficient in Python development with FastAPI and Django frameworks. Skilled in setting up both SQL (ORM) and NoSQL databases, including PostgreSQL and Redis. Experience with integrating third-party APIs and services. Development of feature-rich Telegram bots. Contributed to the creation of a large-scale web scraper. Involved in unit and integration testing, CI/CD pipeline setup, documentation, and ongoing software support and maintenance.

ENESTECH Software

Kyiv Remote
Duration: 1 year

Full Stack Developer

Involved in the full development cycle of various applications, including both Front-End and Back-End components. Responsible for designing workflows and implementing business logic across different application modules. Developed user interfaces using TypeScript and React, while ensuring a Responsive and Mobile-First design approach with Tailwind CSS, SASS, and Motion libraries. Utilized Zustand for state management in React applications. Led the development of a large-scale, functional microservice architecture for a CRM system, leveraging Python, FastAPI, PostgreSQL, and Redis, with deployment on AWS. Contributed to unit and integration testing, CI/CD pipeline configuration, documentation, and ongoing software support and maintenance.

Education

Kyiv Interregional Academy of Personnel Manegment
Higher education
2015-2019
